

ArcSurvey

Complex customer survey made simple

Survey Form

Create participant-friendly survey forms with questions in conversational style to give a one-on-one talk feel. Make it impressive and professional-looking with your customization. Configure logics to customize the survey flow in response to real-time answers in every step.

Audience Communication

Communicate with the audience through emails and in-app notifications. Receive instant alerts whenever a survey submission is made and alert participants or a group of audience on their forthcoming surveys—less chaotic back-and-forth communication.

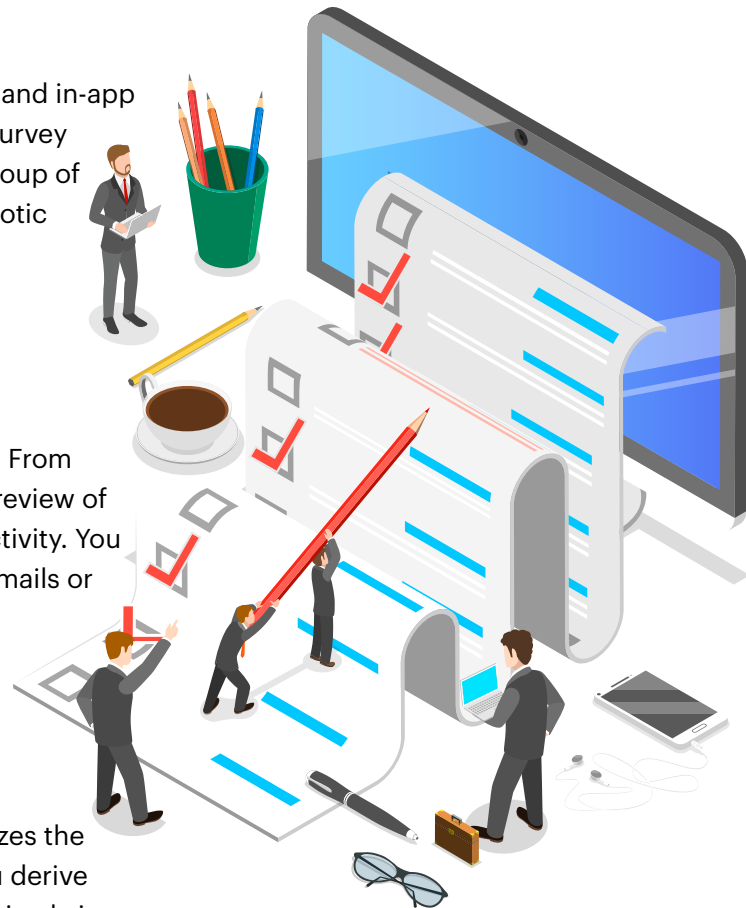

Survey Management

One stop location to manage all the survey data. From here, download the survey results, get a quick preview of the survey, and clone the survey for any other activity. You can set up user profiles and send survey invite emails or reminders to all in one go.

Survey Data & Reports

The application pools the survey data and visualizes the trend observed in the form of charts, helping you derive the key insights of the survey. Also, get a summarized view of the results if you want to know how respondents have replied to a specific category.
